

Information regarding tray labeling according to Regulation (EU) 2025/40 (PPWR)

Dear Business Partner,

We will, of course, implement the requirements of Regulation (EU) 2025/40 (PPWR) applicable to us as of 12 August 2026.

This information refers to our trays, which are classified as transport packaging under the PPWR and for which we are considered the producer. The labeling obligation for the identification of packaging pursuant to Article 15(5) of the PPWR is met by the series abbreviation (e.g., "Normpack 204"). Labeling with the name and address of the producer pursuant to Article 15(6) of the PPWR is currently provided via the accompanying documents (delivery note).

The background for the labeling via accompanying documents is the ongoing technical integration of this information directly into our production tools. Until these tool adjustments are completed, the labeling requirement for our trays will be fulfilled in a legally compliant manner via the delivery note.
